**Bahasa Inggris SMA/MA IPA****The text below is for questions 26 to 28****The Near- Death Story of Mellen-Thomas Benedict**

In 1982, I died from terminal cancer. My condition was non-operable. I chose not to have chemotherapy. I was given six to eight months to live. Before this time, I had become increasingly despondent over the nuclear crisis, the ecology crisis, and so forth. I came to believe that nature had made a mistake—that we were probably a cancerous organism on the planet. And that is what eventually killed me.

Before my near-death experience, I tried all sort of alternative healing methods. None helped. So I determined that this was between me and God. I had never really considered God. Neither was I into any kind of spirituality and alternative healing. I read various religions and philosophies. They gave hope that there was something on the other side.

I had no medical insurance, so my life savings went overnight on tests. Unwilling to drag my family into this, I determined to handle this myself. I ended up in hospice care and was blessed with an angel for my hospice caretaker, whom I will call "Anne." She stayed with me through all that was to follow.

26. According to Mellen-Thomas Benedict, what is the reason for many people to die of cancer?
  - A. The nuclear and ecology crises.
  - B. All sorts of alternative healing methods.
  - C. They do not believe in the existence of God.
  - D. Chemotherapy is too expensive for most people.
  - E. The nature's mistake to make the human being a cancerous organism.
  
27. We know from the story that Mellen-Thomas Benedict believed that he eventually died ....
  - A. because God decided so
  - B. because he was not operated
  - C. because he did not have chemotherapy
  - D. because of the alternative healing methods
  - E. because he did not have any medical insurance
  
28. Why did he choose to stay in a hospice care?
  - A. They will take care of his health problem.
  - B. He had to do the medical checks there.
  - C. Anne asked him to stay there.
  - D. His family told him so.
  - E. He was broke.

**Bahasa Inggris SMA/MA IPA****The following text is for questions 29 to 32**

Tornados occur when the conditions that cause thunderstorms are unusually violent. Winds blow in opposite directions around a strong updraft start a narrow, violent whirl. Centrifugal force effectively throws the air away from the center, leaving a core of very low pressure. This is much like stirring water in a cup, thus forming a vortex-like dip in the surface.

This low-pressure core acts as a partial vacuum, sometimes helping to lift the roofs off houses. Most of the damage, though, results from the force of the wind itself. Around the edges of the whirl, wind speeds may reach 300 miles (480 kilometers) per hour. At first, the tornado's funnel is whitish-gray because it is composed of minute water droplets formed as the air in the funnel expands and cools. After touching down, the funnel becomes dark because of all of the debris it has picked up. This debris can include soil, tree limbs, and parts of buildings; tornados have been known to pick up automobiles, horses, and whole trees.

A tornado usually moves toward the east (or often northeast in the Northern Hemisphere and southeast Hemisphere) at 25 to 40 miles (40 to 65 kilometers) per hour. Fortunately, most tornados are less than half a mile (800 meters) wide; the edge of one may destroy all of the houses on one side of a street while leaving those on the other side completely undamaged.

Deaths from tornados in the United States averaged roughly 100 per year over the last century. However, they have dropped somewhat in recent decades as better forecasting and warning systems have been implemented

29. Why have deaths from Tornado in the United States decreased in the recent decades?
  - A. Most tornados are less than half a mile wide.
  - B. There are no more tornados in the United States.
  - C. There are better forecasting and warning systems.
  - D. The tornado left the United States completely undamaged.
  - E. The people are evacuated by the United States government.
30. Why is tornado's funnel dark as soon as it touches the ground?
  - A. It contains water droplets.
  - B. The temperature is changed.
  - C. It contains building materials.
  - D. It whirls in high speed.
  - E. It has picked up debris.
31. What are the impacts of Tornado?
  - A. Water dropping.
  - B. Heavy disasters.
  - C. Whirl of winds.
  - D. Wind blowing.
  - E. Grey and dark sky.

**The following text is for questions 33 to 35**

Faster planes and cheaper flights are making it easier than ever before for people to travel. In the most 'developed' societies, visiting exotic places is a sought-after status symbol. The tourism industries of both developed and developing countries have recognised this fact and are learning to take advantage of it.

There are, however, some problems associated with this new industry. Firstly, there is the increasing crime rate. Some locals see tourists as an easy prey because, not only are they in unfamiliar territory and therefore less able to take care of themselves, but also they carry visible items of wealth, such as cameras and jewelery which can be disposed of quickly for profit.

Another major problem is health. With greater mobility comes greater danger of spreading contagious diseases around the world. One carrier returning home could easily start an epidemic before their illness was diagnosed. Moreover, the emergence of many diseases which resist antibiotics is causing scientists to be increasingly concerned about this issue.

Also to be considered is the natural environment, which can be seriously threatened by too many visitors. Australia's Great Barrier Reef, for example, is in danger of being destroyed by tourists and there are plans to restrict visitors to some of the more delicate coral cays.

These are just three of the reasons why any country should be wary of committing itself to an extensive tourism development program.

33. Why does the natural environment become one of the serious problem associated with the faster planes and cheaper flight? Because ....
- A. it easily started an epidemic before their illness was diagnosed
  - B. it can be destroyed by too many visitors
  - C. the health problem will increase
  - D. they carry visible items of wealth
  - E. it can increase crime rate
34. Why is the crime rate increasing due to the new industry?
- A. Some tourists carry visible items of wealth.
  - B. The tourists are spreading contagious diseases.
  - C. The government is planning to restict visitors to some coral cays.
  - D. The new industry makes the number of unemployment increase.
  - E. The tourists come by plane.

**The following text is for questions 36 to 38.**

In the sequel of 'Sherlock Holmes' this time, Professor James Moriarty (Jared Harris) is the most dangerous enemy. Moriarty is not the kind of person who is hesitant to remove the lives of many people in order to achieve his goals. Explosions in Strasbourg are one of the results of Prof. Moriarty's creation.

Holmes was nosy when his friend, Dr. Watson (Jude Law) was getting married, because the marriage would automatically make Holmes lose his partner in investigating the case.

A gypsy woman, Madam Sinza Heron (Naomi Rapace), helped Holmes the adventure this time. There was also the Holmes brother, Mycroft Holmes (Stephen Fry) who came to be an accomplice of the detective this time.

Arguably, the visual effect of 'A Game of Shadow' is more stable than its predecessor. A few slow-movement scenes later find in the cease-fire. Colors are displayed also feels right.

Farce as those made by Holmes and several other characters in the film guaranteed to invite laughter. The chemistry between Robert Downey Jr. and Jude Law is not be doubted anymore. Since in the first film, the two men were able to captivate the audience and not be missed.

Chess compete between Holmes and Prof. Moriarty became the ultimate point. They both described the mind wanders respectively. Do you intrigued with the acting of the detective? The film 'Sherlock Holmes: A Game of Shadow' can be an alternative entertainment at this weekend.

The following text is for questions 42 to 44.

Many people imagine the sea-horse to be real horse living in the sea. This is not true at all. The sea - horse is so called because it is a tiny creature with a horse-like head which lives in the sea. Sea-horse are found mostly in warm seas.

They have a long, flexible tail which is used for wrapping around weeds for support. They swim upright position, their movements being helped by a rapidly oscillating fin on their back. The male sea-horse lays her eggs in this pouch.

The most remarkable thing about the sea-horse is that part of the process of reproduction is taken over by the male creature. Once the female sea-horse has laid her eggs in the male creature's pouch, she leaves. The hatching of the egg is done by the male fish. Mating begins with the male and the female sea-horses doing courtship dance. The male and female creatures swim around each other in circles.

At the end of the dance, the male appears to bow to its partner; but actually, the male is banding to pump water from his pouch. Next, the female fish lays eggs into the male's pouch. About two hundred eggs are laid. The pouch, then close up. The female sea- horse now swims away, leaving the male sea-horse to do hatching.

The eggs are hatched about a month later. The young sea-horses are ejected from the male creature's pouch by means of muscular contractions.

42. How does the sea-horse swing its fin?
  - A. With its back.
  - B. With its position.
  - C. With its flexible tail.
  - D. With a slow manner.
  - E. With a fast movement.
  
43. What makes sea-horse remarkable?
  - A. Its size.
  - B. Its reproduction process.
  - C. Its shape.
  - D. Its respiratory process.
  - E. Its rapid movement.
  
44. We know from the text that ....
  - A. sea horse eat weeds for their food
  - B. the male sea-horse do the hatching
  - C. sea-horse is called because it is a tiny horse
  - D. the female sea-horse keeps her eggs in her pouch
